Education

SSVPS Bapusaheb Shivajirao Deore College of Engineering — Dhule, Maharashtra
B.Tech in Computer Science Engineering — CGPA: 8.1 / 10 — *August 2023 – June 2027*

Experience

Backend AI Engineering Intern — Jun. 2026 – Aug 2026
FlyRank AI (Remote) — *Chicago, USA*

- Delivered a **FastAPI REST API** across **3 staged assignments**, progressing from in-memory storage to SQLite and Dockerized PostgreSQL; added Pydantic request/response schemas, reusable Supabase JWT authentication dependencies, protected routes, and Swagger API documentation
- Implemented a **six-stage Python web-scraping pipeline** with pagination, **8-field extraction**, price normalization, URL-based deduplication, caching, and HTTP error handling; generated separate JSON outputs for validated records, failures, and run metrics, and verified **idempotency across repeated runs**

Data Science & Machine Learning Intern — Apr. 2026 – Jun. 2026
UniConverge Technologies · Upskill Campus (Remote) — *Noida, India*

- Fine-tuned a **YOLOv8 model** on agricultural field images for crop and weed detection across sesame crop varieties; applied Keras ImageDataGenerator augmentation to improve class balance.
- Completed a machine learning capstone covering **data preprocessing, feature engineering, model training**, and **evaluation** on an industrial dataset.

Data Analyst Intern — Sep. 2025 – Oct. 2025
Edunet Foundation · VOIS & Vodafone (Remote) — *Maharashtra, India*

- Processed **50,000+ customer feedback records** using Pandas and NumPy, implemented an LLM-assisted ETL pipeline for trend detection and weekly summaries, and created **3 Power BI dashboards** tracking NPS, churn signals, and campaign KPIs.

Projects

SecAgent – Automated Security Assessment Agent | *Python, FastAPI, Nmap, REST APIs —* ***Github*** 2026

- Orchestrated a **five-stage security assessment pipeline** using **Nmap scans, XML service parsing, local CVE matching**, remediation analysis, and JSON/Markdown reporting; added mock-fixture support for testing.
- Added **target allow-listing, IP** and **port restrictions, XML entity rejection,** and **scan timeouts**; tracked findings by source across live scans, mock fixtures, and supplied scan data.

RepoLens AI – GitHub Intelligence Agent | *Python, Haystack, Gemini API, MCP, ChromaDB —* ***Github*** 2026

- Connected Haystack Agent with Gemini and a **GitHub MCP server**, using Streamlit for natural-language repository queries and dynamic tool discovery; resolved Gemini's incompatibility with MCP tool schemas containing **x-mcp-header** annotations
- Implemented **repository-document RAG** using **gemini-embedding-001**, **ChromaDB**, and Gemini 2.5 Flash; added source-attributed answers and evaluated retrieval with **4/4 targeted query hits** and **4 passing tests**

VisionVoice AI – Multimodal Visual-to-Audio Assistant | *Python, Gemini, Streamlit, gTTS —* ***Github*** 2026

- Implemented a **PDF/image-to-speech pipeline** using **Gemini 1.5 Flash** for structured content extraction and **gTTS** for multilingual narration, connecting visual document input to generated audio through a Streamlit interface.

Technical Skills

Programming: Python, TypeScript, SQL
AI & Agents: Gemini API, Groq API, Haystack, CrewAI, LangGraph, RAG, ChromaDB, MCP, Streamlit, gTTS
Backend & APIs: FastAPI, Uvicorn, REST API design, Pydantic, JWT (Supabase Auth)
Data Engineering: Pandas, NumPy, BeautifulSoup4, Nmap XML parsing, structured JSON reporting, Async Python
Tools & Infrastructure: Docker, Docker Compose, PostgreSQL, SQLite, Vitest, pytest, Git / GitHub

Certifications & Achievements

Google — **5-Day AI Agents Intensive** | Anthropic — **Introduction to Model Context Protocol (MCP)**
NVIDIA — **Augment Your LLM Using Retrieval-Augmented Generation** | Scrimba — Learn AI Agents
Databricks — Generative AI Application Deployment and Monitoring
McKinsey & Company – Forward Program (Problem-solving, communication, digital literacy)
Infosys Springboard Pragati: Path to Future (Data Science Track)
1st Runner-Up – Internal Smart India Hackathon 2025
